Art Unit: 1714

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the A person shall be entitled to a patent unless –

effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 7, 9, and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by US Pat. No. 5859111 Kukkala et al..

Kukkala discloses the instantly claimed compositions at column 4, lines 12-63, with lines 12-27 encompassing the use of no organic solvent, lines 38-49 encompassing the instantly claimed anionic surfactants, and lines 33-38 encompassing the instantly claimed chain extenders, column 5, lines 1-8, which encompasses the instantly claimed solids content; column 6, lines 1-9, which encompasses the instantly claimed solids content and particle size; column 7, lines 30-46, which encompasses the instantly claimed chain extenders; column 16, lines 30-39, which shows the benefits of smaller particle sizes; and the remainder of the document.

4. Claims 7, 9, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 5859111 Kukkala et al..

Kukkala discloses the instantly claimed compositions at column 4, lines 12-63, with lines 12-27 encompassing the use of no organic solvent, lines 38-49 encompassing the instantly claimed anionic surfactants, and lines 33-38 encompassing the instantly claimed chain extenders, column 5, lines 1-8, which encompasses the instantly claimed solids content; column 6, lines 1-9, which encompasses the instantly claimed solids content and particle size; column 7, lines 30-46, which encompasses the instantly claimed chain extenders; column 16, lines 30-39, which shows the benefits of smaller particle sizes; and the remainder of the document. It would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the instantly claimed combinations of parameters and ingredients in the latex of the patentee because they are encompassed by the patentee and would have been expected to give a latex having the properties disclosed by the patentee.
